

Sustainable Flooring Selection

In today's environment, the selection of a sustainable floor is not as easy as it may seem. Nor should it be. Conflicting marketing messages, multiple definitions for sustainable flooring and the complicated LEED rating system can make the process somewhat confusing.

This program will outline the most important issues to consider and steps to take to successfully select a sustainable floor. The agenda will include:

- Sustainable Floor Attributes
- Sorting through Marketing Claims
- LEED
- Human Health Considerations

The program will be presented by Carol Fudge and Matt Dorf of Nora Systems, Inc. As Sr. Marketing Specialist for Nora, Carol is responsible for environmental issues and has over 15 years experience in the flooring industry. Carol is LEED-AP certified and knowledgeable about current environmental issues and programs. Matt has over 11 years of sales experience in the flooring industry and is up-to-date on the latest industry developments and trends. He is Nora's Account Executive responsible for Connecticut, Rhode Island and Western Massachusetts.
